## Four Seasons Unveils New Hotel Gym Essential

Four Seasons Hotels and Resorts and CLMBR bring CLMBR Connected, a vertical climbing machine, to all brand hotels and resorts worldwide, offering travelers a new way to blow off steam and find healthy living on the road. The implementation should be in place by mid-2021.

CLMBR Connected is a vertical climbing machine for at-home and commercial use and just completed its first funding round led by venture capital and private equity firm KBW-Ventures; Marco Borges, CEO and founder, 22 Days Nutrition; and others. KBW Ventures, through its investment, will integrate CLMBR into its Four Seasons hotel properties worldwide.

CLMBR is the first vertical climber to feature a large-format touch display with on-demand, instructor-led classes. The patent-pending design has a high-quality build with an integrated audio system that can fill an entire room with sound. With a minimal level of maintenance, the state-of-the-art companion app displays key metrics like vertical feet climbed and workout targets. Most hotel gyms feature outdated climbing machines that have an obtrusive center pole; CLMBR eliminates that obstruction with the touchscreen, and pre-loaded tutorials will help hotel guests adjust to the machine. Users can track their progress on the go with the app.
